

FOR IMMEDIATE RELEASE: 24/04/2019

ALLIOT BECOME EXCLUSIVE UK DISTRIBUTOR FOR NETVOX

Specialist IoT distributor, Alliot launches Netvox sensors to UK market.

Huddersfield, West Yorkshire / April 24th, 2019 – Specialist IoT distributor, Alliot has today become the first UK distributor of Netvox sensors. Dedicated to the development of more easily accessible IoT solutions, the new distribution agreement sees Alliot launch a variety of LoRa sensors taken from the leading manufacturer's portfolio.

Founded in Taiwan, in 1996, Netvox has developed an outstanding reputation for their expertise in the design and manufacturing of IoT sensors. This has seen them achieve successful applications with a number of blue chip companies in areas such as Smart Home, Security, Smart Office, Smart Classroom, Agriculture and Multi-Sensor applications.

Commenting on their recent appointment, Alliot's MD, Darren Garland said, "We are absolutely delighted to be named as Netvox's exclusive UK-based distributor. Having scoured the market, we firmly believe that Netvox sensors will help to fill a gap in the IoT space, making it more accessible for all.

"Until now sensors have either been limited or incredibly expensive due to the cost implications of manufacturing bespoke units. Netvox offer a wide variety of sensors for a broad range of applications, together with our technical expertise and pre-configuration services, we're confident that Netvox will open up plenty of opportunities for people looking to create and implement IoT solutions on the LoRa network."

Kent Shen, Vice President at Netvox said, "What we see in Alliot is more than a group of well organized IoT experts, we see people with extreme passion towards promoting our IoT solution, even further, a company with huge ambition of giving LoRa network input into all possible contexts. Alliot is building a foundation of providing a better future for all, it starts from the daily life and will be committed to more.

"Alliot represents us around the UK with their best sales team and professional services which provide end users with a much easier and efficient approach to using our products. We have strong faith in Alliot expanding the LoRa network territory in Europe, alone we can do so little, together we can do so much."

END
